28 September 2007

Dear Ian,

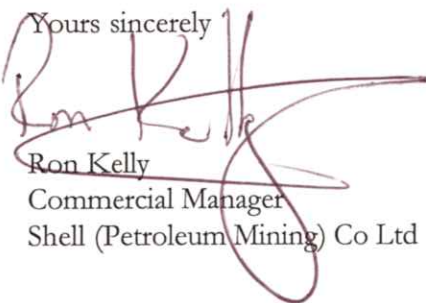

Thank you for the opportunity to provide on the Gas Industry Co.'s Statement of Proposal - Information Disclosure by Owners of Gas Processing Facilities, dated September 2007.

Shell's response to the questions contained in the Statement of Proposal are attached.

In summary, as previously advised, Shell supports the information disclosure regime proposed as a voluntary regime. However, given that a voluntary regime has not been achievable, and given that the status quo is not an option, Shell understands the necessity for GIC to recommend the regulatory imposition of the disclosure regime.

Shell is happy that the GIC publishes the letter and attachment, and provide any additional explanation where that might assist the GIC.

Yours sincerely

Ron Kelly  
Commercial Manager
