Dear Ian

Comments on the GIC's Proposed Updates to the Gas Measurement Requirements and Procedures Document

Thank you for the opportunity to provide comments on the Gas Industry Company's (GIC) proposed updates to the *Gas Measurement Requirements and Procedures Document* (the Document), released in June 2019.

Vector provides its comments and suggested changes on the attached Word version of the Document published by the GIC, in addition to the GIC's amendments that are already marked up in the Document.

We highlight our comments and proposed changes (in blue) throughout the Document for easy tracking. Our comments are mainly around ensuring that references to gas measurement standards, particularly NZS 5259, are up to date. Where a reference document is not publicly or readily available, we indicate that the relevant standard or section in the reference document "needs to be checked" by the GIC.

There is nothing confidential in our comments and suggested changes, and we have no issues with the GIC publishing this letter and the attached Document.

Please contact me if you have any questions or require further information at 09 978 7822 or Bill.Miller@vectorams.co.nz, or Tom Tetenburg (Gas Metering Systems Technical Advisor) at 09 978 7848 or Tom.Tetenburg@vectorams.co.nz.

Yours sincerely

A handwritten signature in blue ink, appearing to read "Bill Miller", with a long horizontal stroke extending to the right.

Bill Miller
