

Gas Industry Co.

News Bulletin 5 June 2026

Kia ora

Welcome to the latest Gas Industry Co News Bulletin.

In this bulletin:

- [Disconnection and Decommissioning](#)
- [Outage Disclosure Rules](#)
- [Gas Levy - FY2027](#)

Disconnection and Decommissioning

We have published guidance to support residential consumer decisions regarding disconnecting or decommissioning gas connections.

The guidance provides an overview of the differences between disconnection and decommissioning, cost and timing considerations, and the process involved.

Existing disconnection and decommissioning processes will be considered as part of our Future of Gas Infrastructure workstream.

The guidance is available [here](#)

Outage Disclosure Rules

We have completed our assessment of gas production forecasts and compliance with the Gas (Facilities Outage Information Disclosure) Rules 2022.

These rules facilitate transparent disclosure of information regarding planned or unplanned outages at gas production or storage facilities.

Our review of 12-month production forecasts for the period April 25 – March 26 compared with actual production and reported outages, focused on drops of 20 terajoules (TJ) or more in actual production versus forecasts.

We found no unexplained discrepancies in actual production compared to the forecast data provided for the period.

Gas Levy – FY2027

The Gas (Levy of Industry Participants) Regulations 2026 are due to come into force on 1 July 2026.

The levy is our main source of funding. It is authorised by way of regulations which we recommend to the Minister each year.

Information on the levy setting process and principles can be found on the [Levy page](#) on our website.
