

Welcome to Gas Industry Co's *News Bulletin*, a periodic advisory of new and current consultations, workstream developments, publications and presentations.

In this issue:

- Gas Transmission Access Code (GTAC) Workshop
- Review of Daily Allocation Options

Gas Transmission Access Code (GTAC) Workshop

First Gas expects to publish a revised draft GTAC on Monday, 11 September. On Friday, 15 September, it will hold a workshop to explain the changes it has made, the reasons for those changes, and to allow stakeholders to ask questions. Mark-ups and submissions on the draft GTAC are due on 9 October (details of these processes will be notified shortly), so the workshop offers a good opportunity for stakeholders (and their legal advisors) to prepare for that work.

WORKSHOP DETAILS

Venue	Maui Room, Gas Industry Co, Level 8, The Todd Building, 95 Customhouse Quay, Wellington
Date	Friday 15 September 2017
Time	10.00am to 4.00pm (a light lunch will be available) RSVP to Alison O'Connor by 11 September 2017 Please RSVP your attendance for catering purposes*
Teleconference	10.00am to 4.00pm RSVP to Alison O'Connor by 11 September 2017 Please dial 08 30 32 and use the Guest Pin below Guest Pin 199285

Review of Daily Allocation Options

At its June 2017 meeting, the Daily Allocation Working Group (DAWG) discussed possible alternatives to the status quo D+1 algorithm. These alternative daily allocation options sought to assess:

- the impact on accuracy of an increase in the amount of telemetry data available for the daily D+1 runs
- the tradeoff between a more simple, but potentially more timely and more reliable, market share allocation versus a model that incorporates available telemetry data

- the impact on D+1 of the proposal by First Gas to move away from a pool-based balancing regime to a whole-of-system balancing regime along with the introduction of daily nominated capacity at a delivery point or delivery zone level

Gas Industry Co undertook to analyse the alternative daily allocation options using 12 months of data (the 2016 calendar year) and report back to the DAWG. The results of the analysis are summarised in the PowerPoint report available [here](#).
