

Welcome to Gas Industry Co's *News Bulletin*, a periodic advisory of new and current consultations, workstream developments, publications and presentations.

**In this issue:**

- Further material on the 8 December 2017 Final GTAC

## Further material on the 8 December 2017 Final GTAC

At a workshop on 12 December, First Gas presented the 8 December Final GTAC. It also agreed to provide the following additional support material requested by stakeholders:

1. A markup of the GTAC showing only the changes from items A to E of the GTAC November Workshops Actions List;
2. A table describing how First Gas made the choice on how the Excess Running Mismatch (ERM) charges would be rebated;
3. A note on how the Reasonable and Prudent Operator (RPO) definition relates to those commonly used internationally in pipeline contracts;
4. A link to the Commerce Commission determinations on the 2005 Todd Petroleum Mining and Todd Taranaki application seeking authorisation under section 58 of the Commerce Act of certain provisions in the Maui Pipeline Operating Code (MPOC); and
5. Updates of the Receipt ICA and Delivery ICA.

Items 1 to 4 are now available [here](#). Item 5 will be available at the same location tomorrow.

In addition, First Gas agreed to hold a workshop following publication of Gas Industry Co's final assessment of whether the GTAC is materially better than the existing access arrangements. Details will be provided closer to that time.
