

Welcome to Gas Industry Co's *News Bulletin*, a periodic advisory of new and current consultations, workstream developments, publications and presentations.

In this issue:

- CCO Incident Report for 23 May critical contingency released.
- March 2017 Quarterly Report published.
- CONSULTATION REMINDER: *Gas Transmission Access Code: Emerging Views on Detailed Design*
- CONSULTATION REMINDER: Gas Metering Review

CCO Incident Report for 23 May critical contingency released.

On 23 May, the Critical Contingency Operator (CCO) declared a critical contingency following a breach of the Kapuni Gas Treatment Plant pressure threshold. The *Incident Report* for this event has now been published on the CCO website: <http://www.cco.org.nz/historical-cc-events>.

March 2017 Quarterly Report published.

Gas Industry Co's *March 2017 Quarterly Report* is available on our website. Amongst other items, we continue to highlight development in our gas transmission work, and our proposed strategy, work programme and levy requirements. The report also includes the industry performance measures quarterly report.

CONSULTATION REMINDER:

Gas Transmission Access Code – Emerging Views on Detailed Design

At the 17 May GTAC workshop, First Gas released the paper *Gas Transmission Access Code – Emerging Views on Detailed Design* and invited stakeholder comments. The paper covers three workstreams: pricing, access products, and balancing and allocation.

Submissions are invited by **5.00pm Friday 23 June 2017**.

You are welcome to provide any feedback in your submission. To assist you, and our analysis, a Submissions Template is available [here](#) along with the paper and other information on the GTAC work programme.

CONSULTATION REMINDER: Gas Metering Review

Gas Industry Co reminds stakeholders of the **14 June 2017** deadline for comments and feedback on two gas metering papers: *Gas Metering Review: Review of metering service provider arrangements*, and *Gas Metering Review: Review of advanced metering technology*.

Both papers were authored by Rod Crone Consulting and describe current metering arrangements and spell out the possibilities offered by advanced metering with a view to assessing whether there are barriers to competition in the metering market or to deployment of advanced meters.

You can read the papers, and make submissions [here](#).
