

Welcome to Gas Industry Co's *News Bulletin*, a periodic advisory of new and current consultations, workstream developments, publications and presentations.

In this issue:

- Final report on critical contingency price for May event available.
- Statement of Intent published.
- 2017 Levy Regulations take effect.
- Consumer switching numbers for June 2017 available.
- Search your gas connection.

Final report on critical contingency price for May event available.

Today the industry expert issued his final report on the critical contingency price for the system imbalance event that occurred on 23 May. Tim Denne of Covec has determined the price of \$10.62/GJ for settling the contingency imbalances that occurred on the day, and the reasons for his determination are outlined in his report.

The next steps in the process of settling contingency imbalances is for First Gas, as the transmission system owner, to determine the volume and value of the positive and negative contingency imbalances; and for Gas Industry Co to issue credit notes and invoices accordingly. The final report can be found [here](#).

Statement of Intent published.

We have released our *FY2018-20 Statement of Intent* (SOI). The SOI is published annually and sets out Gas Industry Co's Work Programme for the coming year, together with an indication of expected activity for the subsequent two years. These were developed in consultation with stakeholders. The *Statement of Intent* can be found [here](#).

2017 Levy Regulations take effect.

The Gas (Levy of Industry Participants) Regulations 2017, which provide for Gas Industry Co's wholesale and retail levies for the financial year ended 30 June 2018 came into force on 1 July 2017. The levies were also developed as part of the consultation process referred to above. The 2017 Levy Regulations can be found [here](#).

Consumer switching numbers for June 2017 available.

The Gas Registry Statistics recording gas consumer switching numbers for June 2017 have been released. There were 4,443 customer switches completed during the month. There were 329 less switches in June than in May 2017 and 22 more switches than in June 2016. The latest switching statistics can be found [here](#).

Search your gas connection.

After consultation to amend the bounds of information viewed by any person under the [Switching Determinations](#), Gas Industry Co has created a tool that enables you to search for a gas connection by either entering an ICP number or a street address. The information displayed is sourced directly from the gas registry and it provides general status, retailer, meter and network details for an individual ICP. [Search for your gas connection](#) can be found on our website and we encourage you to take a look and direct anyone to it who may find it of use.
