

MEMORANDUM

TO: GTAC Stakeholders
FROM: First Gas
DATE: 3 July 2018
RE: Workstream 1 – 1.2 ICA Summary

This memo provides a summary of the existing Interconnection Agreements (ICAs) held between First Gas and interconnected parties. The purpose of this document is to assist stakeholders in understanding the scope of interconnects and where these interconnection agreements will survive under the GTAC.

Status of Existing ICAs under the GTAC

Due to the construction of the Maui Pipeline Operating Code (MPOC) agreements under this code will terminate upon termination of the MPOC. Agreements under the Vector Transmission Code (VTC) are bilaterally negotiated and therefore these agreements will continue upon termination of the VTC.

First Gas intends to respect existing contract arrangements and modifications to existing ICAs will focus on operability. This is important to ensure operational certainty for interconnected parties. First Gas anticipates, however, that some parties may wish to transition to new arrangements under the GTAC. We will assist in this process.

Summary of Existing ICAs

The following tables provide a summary of the existing ICAs between First Gas and Interconnected Parties.

Where agreements are confidential we have asked for permission to publish details of the agreement prior to publishing in this table. In some cases this was granted.
